DICKENS MIHESO

SECURITY RESEARCHER · ETHICAL HACKER · CYBERSECURITY ENGINEER

dickensmiheso894@gmail.com | +254 768 436 950 | github.com/Quebec284 | Nairobi, Kenya

PROFILE

Security researcher focused on web application security, vulnerability assessment and SOC analysis. Began exploring computers in 2020 and started a professional path in cybersecurity in 2024, since building hands-on experience identifying and documenting security weaknesses across multiple web application assessments. Currently pursuing a BSc in Cybersecurity & Digital Forensics, with a growing focus on penetration testing, digital forensics and threat analysis.

EDUCATION

Zetech University **2024 — Present**
BSc in Cybersecurity & Digital Forensics

Mwihila Boys **2020 — 2023**
High School

Kisaina Primary **2010 — 2019**
Primary School

SELF-DIRECTED LEARNING

SOC analysis, web application security and password auditing — TryHackMe, Offsec.

TECHNICAL SKILLS

Web Vulnerability Testing (XSS, SQL Injection, CSRF) · Network Scanning & Enumeration · Security Analysis & Risk Assessment · Incident Monitoring (SOC) · Web Security Analysis · Malware Analysis · Network Forensics

PROBLEM-SOLVING SKILLS

Analytical Thinking · Threat Detection & Investigation · Vulnerability Identification · Root Cause Analysis · Decision-Making Under Pressure · Pattern Recognition · Troubleshooting

TOOLS & TECHNOLOGIES

Kali Linux · Nmap · Gobuster · SQLMap · Responder · Wireshark · Metasploit · Burp Suite · Hydra · John the Ripper

PROJECTS

XSS Demo Lab
Safe, controlled demonstration of cross-site scripting attacks and the input handling that prevents them.

Secure Login
Authentication system built around proper input validation and session handling.

SECURITY ASSESSMENTS

› Web App Pentest — XSS vulnerability discovered, session hijacking risk identified and remediated.
› SQL Injection Test — database extraction achieved in a controlled lab; recommended parameterized queries.
› Web Vulnerability Assessment — real-world assessment using Nmap, Nikto, Gobuster and SQLMap.
